

## **June 2008 – iiTOPs and MACCS Intergration**

*iiTOPs* and FPA Software announce the release of the iTMLink linking their two software systems. Users of MACCS (Mortuary and Cemetery Client System) can now transfer memorial orders created in MACCS electronically to iiTOPs (interactive internet Total Order Processing system) without having to duplicate data entry! In addition, users in MACCS can also see the status of orders anywhere in the process in iiTOPs from within MACCS. Users currently using iTMLink report a significant increase in productivity as well as improved accuracy surrounding the memorial order tracking process. For more information, contact [steve@iitops.com](mailto:steve@iitops.com) or [craig.pollack@fpasoftware.com](mailto:craig.pollack@fpasoftware.com).
